(54) Title: METHOD OF IMAGE STORAGE

(57) Abstract: A method of image storage, comprising: the preparation of new image data (16b) based on the initial digital data (16a) of at least one image to be stored, by modifying at least one first characteristic of said image, and the recording on a photographic medium (20) of at least one first and at least one second image in which: - the first and second images respectively have the first characteristic unmodified and the first characteristic modified, - the first and second images also have at least one second common characteristic, separate from the first characteristic, - the first and second characteristics have different storage stabilities, and in which at least one part of at least one of the first and second images is recorded in analog form having directly human-significant contents. Application to document and motion-picture storage.
